

GARDEN SALAD

Words and Music
©1996 Nancy Schimmel

Lively!

CHORUS

2. To make a garden salad, you need a lot of bees
To pollinate the flowers that need more than a breeze
And if you tear a spider web, you say "I beg your pardon,"
That's how you make a garden . . . salad! CHORUS

3. The bees will make tomatoes if you water all the plants
Plan your salad's colors, don't leave this to chance
Add some yellow peppers, put some red-stemmed chard in,
That's how you make a garden . . . salad! CHORUS

4. Oh, do not peel the carrots, the good stuff's on the skins
Be sure to put the carrot tops in the compost bins
There's food for next year's growth in what some people are discardin'
That's how you make a garden . . . salad! CHORUS
